## SKILLS (in order of proficiency)

- PYTHON
- JAVA
- SCALA
- HTML, CSS, JAVASCRIPT
- C

## EDUCATION

Georgia Institute of Technology

2017-Present

Pursuing B.S. degree in **Computer Science**

Expected Graduation: Spring 2021

## EXPERIENCE

### Software Development Engineer Intern at Amazon

Summer 2020

Worked on Amazon's Item Master Service team dealing with catalog items. During this internship, I gained experience working with databases as well as Amazon's item processing system.

For this internship, I used the language Datapath which is similar to NoSQL. Additionally, the item processing that I became familiar with was in Java.

### Teaching Assistant at Georgia Tech

2019-2020

I assisted with the Introduction to Object Oriented Programming course at Georgia Tech. This course is taught in Python and introduces students to common data types and structures as well as concepts, such as iterations, loops, and conditionals.

My responsibilities included holding office hours and creating practice problems for students. This course was taught online, so I also became familiar with digital teaching tools.

## VOLUNTEER

### Catalyst by HackGT

2019

Guided high school students through an image processing program in Python to introduce students whose schools do not offer CS courses to coding.
